

# Introducing Globalstar 9600™ Data Satellite Hotspot

With the **Globalstar 9600** and a **Globalstar satellite phone**, customers can use their existing Wi-Fi enabled devices to send email and post to social media over the newest, most modern satellite network. Whether on land or at sea, you will be able to maintain reliable connectivity when beyond cellular. Experience the industry's fastest MSS data speeds, at an affordable price.

## BENEFITS

- **Productivity** – Uses the industry's fastest data speeds, allowing you to send more in less time, saving airtime costs
- **Portability** – Light weight and small enough to fit in your pocket, with 4 hours of rechargeable battery life
- **Affordable** – No additional cost, uses your existing Globalstar airtime plan minutes
- **Robust** – Send email, photos and other attachments when beyond cellular, or make updates to your social media accounts

## SIMPLE TO USE

1. Download and install the Globalstar Sat-Fi™ App to your smartphone or wireless device
2. Turn on your Globalstar satellite phone and connect it to the **Globalstar 9600**
3. Connect your smartphone or wireless device to the **Globalstar 9600**
4. Your smartphone or wireless device is now connected for email and data

## KEY FEATURES

- Easily send and receive emails and post to social media from any Wi-Fi enabled device
- Conveniently use existing device contacts via the Sat-Fi App
